

Graeme's Adapted Training Programme

6'4" Frame · Recomp & Heavy Mechanical Tension Focus · 4-Day Split

FREQUENCY 4 Days / Week	SESSION LIMIT 50–55 Mins Max	PRIMARY GOAL Upper Chest & Arm Mass	PROGRESSION MODEL Double Progression (Reps 7→10)
----------------------------	---------------------------------	--	--

Sunday — Back + Heavy Biceps

Pull Focus · ~55 mins

#	Exercise	Sets	Reps	Rest	Focus
1	Weighted Pull-ups	4	6–8	3 min	Lat Width
2	Seated Wide Row	4	8–10	2 min	Upper Back Density
3	Cable Face Pull	3	12–15	90 sec	Rear Delts / Posture
4	Incline DB Curl HEAVY	3	6–8	2 min	Bicep Long Head Stretch
5	DB Hammer Curl HEAVY	3	8–10	90 sec	Brachialis / Front Width

- Key Execution Cues:
- **Weighted Pull-ups:** 2 bodyweight warm-up sets first. Focus on pulling elbows straight down to engage lower lats.
 - **Heavy Arm Switch:** Start at a weight where failure or form breakdown occurs at rep 6–7. Build up to 8–10 reps before adding weight.

Monday — Chest A + Delts & Triceps

Push Focus · Volume & Width · ~50 mins

#	Exercise	Sets	Reps	Rest	Focus
1	Incline DB Press (30°)	4	8–10	2 min	Upper Chest Fullness
2	Weighted Dips	4	8–10	2 min	Lower Pectoral Outline
3	Upper Cable Crossover	3	10–12	90 sec	Inner Sternum Gap
4	DB Lateral Raise	4	12–15	90 sec	Side Delt Cap Width
5	Seated Tricep Overhead Ext. HEAVY	3	8–10	90 sec	Tricep Long Head Mass

- Key Execution Cues:
- **Incline DB Press:** Strictly set bench to 30 degrees. Allow dumbbells to converge slightly at top without touching.
 - **Upper Cable Crossover:** Cross left wrist over right (and alternate) at bottom for maximum inner-chest peak contraction.

WEDNESDAY — LEGS & LOWER BODY

Posterior & Anterior Chain · ~55 mins

#	EXERCISE	SETS	REPS	REST	FOCUS
1	Trap Bar Deadlift	4	6–8	3 min	Systemic Power / Core
2	Leg Press (Post-Meniscus)	4	10–12	2.5 min	Quad Loading
3	Romanian Deadlift (RDL)	3	8–10	2 min	Hamstring / Posture
4	Machine Leg Extension	3	12–15	90 sec	Quad Isolation
5	Machine Leg Curl	3	10–12	90 sec	Hamstring Isolation

- Key Execution Cues:
- **Leg Press Safety:** High foot placement, feet shoulder-width, stop at 90 degrees. Smooth 3-second negative descent.
 - **RDLs:** Focus on hip hinge and hamstring stretch to keep pelvic alignment tight and support core posture.

FRIDAY — CHEST B (HEAVY STRENGTH FOCUS)

Heavy Mechanical Tension · ~50 mins

#	EXERCISE	SETS	REPS	REST	FOCUS
1	Incline DB Press (30°) ANCHOR	4	6–8	3 min	Heavy Upper Pectoral Mass
2	Upper Cable Crossover	3	10–12	90 sec	Sternum Contraction
3	Weighted Dips	3	8–10	2 min	Lower Pectoral Outline
4	DB Lateral Raise	3	12–15	90 sec	Side Delt Density
5	Seated Tricep Overhead Ext. HEAVY	3	8–10	90 sec	Tricep Long Head Power

- Key Execution Cues:
- **Friday Progressive Overload Anchor:** Heavy 30° Incline Press. Push maximum safe weight in the 6–8 rep window.
 - **Heavy Tricep Loading:** Don't treat this as a light finisher—load heavy, keep elbows tucked, and stretch overhead.

OVERLOAD STRATEGY & EXECUTION CUES

1. **Heavy Weight Selection Rule:** For all primary movements and arm work, start with a weight where you reach failure or form breakdown at **7 reps**.
2. **Double Progression:** Keep the exact same weight until you can complete **10 clean reps** across working sets. Once hit, increase weight (+1–2.5kg) to drop reps back down to 6–7.
3. **Incline Setup:** Fixed 30-degree bench angle across both Chest A and Chest B sessions.
4. **Cable Wrist Cross:** Alternate left over right and right over left at the bottom of cable crossovers to target inner chest gap.
